DRAFT EMAIL – RYAN MITCHELL • FOUNDER & CEO

TO ryan@apexconsulting.com
SUBJECT Quick question about your client intake process

Hi Ryan,

Apex fits the profile closely — founder-led, scaling advisory practice, at the stage where operations typically become a bottleneck.

Most consulting firms at your stage hit the same wall: the intake and onboarding process becomes a bottleneck. Founders end up spending 30-40% of their time on admin that should run on its own.

I build AI agent systems that handle that entire process — lead qualification, onboarding sequences, document collection — without you managing any of it.

Would it be useful to see a quick sketch of how this would work for Apex specifically?

Each of the 2 qualified leads in this report has a draft outreach like the one above — written specifically for that prospect based on their company, role, and the qualification criteria provided. No two drafts are identical.

DRAFT EMAIL – LAURA BENNETT • OPERATIONS DIRECTOR

TO laura@clearpathdigital.com
SUBJECT The part of your ops that's eating the most time

Hi Laura,

Clearpath fits the criteria well — 12-person digital agency at the stage where reporting and client comms start eating into delivery time.

The agencies I work with typically spend 5-8 hours a week on reporting and comms that an agent can handle automatically — built around how Clearpath specifically runs engagements, not a generic template.

Happy to show you what that looks like for a team your size. No commitment needed.

Ato Sam
